- Proposed Species Rich Hedgerows and Hedgerow Trees
- Proposed Rough Grassland
- Proposed Grassland - Neutral and Acid Mixes
- Proposed Wildflower Grassland
- Proposed Ponds
- Proposed Marginal Planting
- * Potential Locations for Sand Martin Habitat

The restoration of the former brickworks is ongoing. The information shown on this drawing is based on survey information collected in 2012 and the approximate route of the footpaths which have been created since 2012.

Note: Temporary footpaths to be created on the grant of planning permission. The temporary route will be maintained during the operation of the eastern extension area and replaced with the proposed footpath round the southern and eastern boundaries of the eastern extension following the restoration of the eastern extension.
