1. Definitions

Agreed – contributions that have been agreed within a signed legal agreement but have not yet been collected or delivered because the appropriate trigger point for payment has not yet been reached. If the planning application is not implemented, these will not be received.

Allocated – contributions that have been received and assigned to specific projects.

Bonds – financial securities which will need to be paid at certain trigger points during the development; either held or repaid to the developers.

Community Infrastructure Levy (CIL) - applies a charge on new developments to help pay for infrastructure (to be noted this only applies to some parishes within the North Yorkshire curtilage).

Infrastructure – Infrastructure is a broad definition covering the different structures, operations, services, facilities, and space that we use to conduct our lives and those of our families. It primarily encompasses the following areas:

- (i) Affordable housing – as defined in the National Planning Policy Framework: housing for sale or rent for those whose needs are not met by the open market.
- (ii) Education: nursery and early years/Primary/Secondary/Post-16/SEN.
- (iii) Highways (Roads, cycleways, and paths).
- (iv) Transport and travel (rail and bus infrastructure).
- (v) Open space and leisure (including sports facilities): All open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes, and reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity.
- (vi) Community facilities (such as village halls)
- (vii) Digital infrastructure (broadband): this includes electronic communications networks, such as next generation mobile technology (such as 5G) and full fibre broadband connections. It also includes radio and electronic communications masts, and the sites for such installations.
- (viii) Green and blue infrastructure and biodiversity resilience such as rivers, streams, and woodland: a network of multifunctional green space, urban and rural, which can deliver a wide range of environmental and quality of life benefits for local communities.
- (ix) Flood and water management (flood mitigation, management, and defence): this includes infrastructure with the purpose of managing the risk of flood and coastal erosion. This can include structural measures to reduce the likelihood and impact of floods, such as hard defences and flood relief works. It can also include soft

defences such as green infrastructure (e.g. natural flood management and sustainable drainage systems).

- (x) Economic development – supporting expansion of resilience to business in the locality.
- (xi) Health (GP/Acute/Mental Health/Primary Care).

Land – this includes land which is provided instead of money.

Received – contributions received, either monetary or non-monetary.

Section 106 – A land charge regulation within the planning act which covers aspects that planning conditions cannot.

Spent/Delivered – monetary or non-monetary contributions that have been used as intended, either by spending the allocated funds or completing the contribution as agreed.

CIL regulation definitions:

- **59A** - places a duty on charging authorities to pass some Levy funds to local councils where some or all of the chargeable development takes place in an area for which there is a parish or community council. It sets out the proportion of the CIL raised in relation to a development that it applies to. E.g.) 15% neighbourhood.
- **59B** – Sets out how the duty in reg 59A applies where the charging authority accepts a land payment.
- **Regulation 59E** - The charging authority is able to recover funds from the local council in certain circumstances. That is if the local council has not applied the CIL to support the development of its area within 5 years of receipt or has applied the Levy otherwise than in accordance with regulation 59C. When Levy receipts are recovered from a local council, the charging authority must use those funds to support development in the area of that local council.
- **Regulation 59F** - Makes provision for where the duty in regulation 59A does not apply, namely where a chargeable development (or part of a development) takes place in an area for which there is not a parish or community council. In that case, the charging authority has wider spending powers in relation to those parts of its area for which there is not a parish or community council. Those powers are the same as those given to parish or community councils and apply to those funds that would have been passed on had the development taken place in an area for which there is a parish or community council.

2.0 Introduction

- 2.1 This is the North Yorkshire Council Infrastructure Funding Statement (IFS). Local authorities that receive contributions from developers must produce an IFS annually as required by the Community Infrastructure Levy (amendment)(England) Regulation 2019; this came into force 1 September 2019.
- 2.2 North Yorkshire Council came into being on 1 April 2023 replacing North Yorkshire County Council, Selby District Council, Harrogate District Council, Richmondshire District Council, Hambleton District Council, Craven District Council, Scarborough Borough Council and Ryedale District Council.
- 2.3 This statement sets out the position for these areas for the first financial year since the establishment of North Yorkshire Council (NYC) (outside the National Parks). The IFS summarises the amount of developer contributions obtained, allocated and spent in the financial year (1 April 2023 – 31 March 2024). The report covers both Section 106 agreements (S106) commuted sums and Community Infrastructure Levy (CIL) where it is in place.
- 2.4 The report aims to offer local communities and developers' clarity and transparency on contributions received and how these have been or are intended to be used.

Headline Figures from 2023/24

In summary below are some key headline figures which cover the whole geographical area of the new North Yorkshire Council.

CIL is currently collected in the former district areas of Harrogate, Selby, Hambleton and Ryedale, whereas S106 has been collected by all the legacy authorities.

In 2023/24 the former districts that now make up North Yorkshire Council:

- Delivered 975 affordable homes across North Yorkshire.
- Received £4,570,984.78 of S.106 contributions from new development.
- Received 2,253,754.02 in CIL.
- Distributed £396,660.19 of CIL (the local allocation) to town and parish councils.
- Spent £7,841,365.28 of S.106 funds on infrastructure to mitigate development impacts and £2,394,233.94 of strategic CIL on infrastructure to support development of the area.

- 2.5 This is the second Infrastructure Funding Statement to be produced by North Yorkshire Council since it came into being on 1 April 2023. Until such time as a new Local Plan is adopted for North Yorkshire the council will report on entries from each

of the former district areas separately but within a single document for ease and clarity.

- 2.6 This statement will include data and information relating to Section 106 planning obligations receipts for the financial year 2023/24 for each of the former district areas, as well as CIL receipts for the financial year only for the four CIL charging areas (Harrogate, Hambleton, Ryedale and Selby). Both sections will include reporting on specific infrastructure projects either delivered or planned, from the monitoring year 2023/24.

3.0 Section 106 Agreements

- 3.1 Section 106 of the Town and Country Planning Act 1990 enables a local planning authority (LPA's) to enter into a negotiated agreement – a planning obligation – to mitigate the impact of a specific development and make it acceptable in planning terms. The planning obligations take the form of a Section 106 (S106) agreement between a developer/landowner, the council, and possibly other parties, or alternatively a unilateral undertaking providing a legal commitment by the developer alone.
- 3.2 Planning obligations are legal agreements that can be attached to a planning permission to mitigate the impact of development. For example, new residential development can place additional pressure on existing social, physical, and economic infrastructure in the surrounding area. Planning obligations aim to balance extra pressure with improvements to the surrounding area, to ensure that development makes a positive contribution.
- 3.3 Planning obligations could be sought for the provision or contribution to a new or improved road, school, health facility or local green infrastructure. Local planning authorities can also seek planning obligations to secure a proportion of affordable housing from residential developments.
- 3.4 Regulations state that a planning obligation may only constitute a reason for granting planning permission for the development if the obligation is:
- (i) necessary to make the development acceptable in planning terms;
 - (ii) directly related to the development;
 - (iii) and fairly and reasonably related in scale and kind to the development.
- 3.5 Prior to Local Government reorganisation (LGR) the former North Yorkshire County Council (NYCC) also published a separate IFS. This was used as a mechanism for presenting the infrastructure position for education and highways departments.
- 3.6 The previous statement set out the infrastructure position for the former North Yorkshire County Council separately. This included income and expenditure for the Education and Highways S106 contributions held by the former County Council. In this report those figures have been integrated into each of the legacy authority area sections they relate to below.
- 3.7 It is important to note that in compiling the data for this statement this is done collaboratively with the council's finance department which operates using the accruals process of accounting. This broadly means that accrued revenue is recognised at the time a company delivers a service or good (at invoice) not when

the council is paid. Whilst effort has been taken to ensure money received data is when the income reaches the council there may be occasions were received refers to the date of invoice. Any discrepancies that arise will be addressed in future funding statements.

- 3.7 It is also noted, particularly in relation to education commuted sums there are occasions when compiling budgets for the delivery of projects initial funds are drawn through other means due to the commuted sums not being available at that time. This is why the spend of S106 funds can be later than the projects construction.
- 3.8 The statement will now present the S106 position for the monitoring year for each former area, using a summarised and more detailed table.

4.0 Community Infrastructure Levy (CIL)

- 4.1 The 2008 Planning Act made provision that most financial contributions could be secured by the Community Infrastructure Levy (CIL). It was the government's intention at the time that this would become the usual means of securing funding for off-site infrastructure, excluding affordable housing. This general intention has not changed and may be expanded in due course. It would also allow the pooling of contributions (in a manner not previously permitted by S106 agreements) over a wide geographic coverage (rather than only to the town/parish where the development which generated the funds was sited).
- 4.2 In contrast to S106 contributions with CIL spending:
- there does not need to be a direct link between the payment and the infrastructure provided.
 - the use of CIL is not specified at the point of collection.
 - CIL is calculated using an administrative process rather than a negotiation based on an assessment of development impacts.
 - it applies to developments that are often smaller in scale as well as large scale.
 - A proportion of the CIL is allocated locally, as is a portion to cover administrative expenses.
- 4.3 Prior to the establishment of North Yorkshire Council, CIL was adopted in four of the former Councils:
- Selby District Council, adopted CIL in 2016
 - Harrogate District Council, adopted CIL in 2020
 - Hambleton District Council, adopted CIL in 2015
 - Ryedale District Council, adopted CIL in 2016
- 4.4 The Charging Schedules in place for these former districts will continue for the respective areas as part of North Yorkshire Council until such time as the new North Yorkshire Local Plan is adopted. The Craven, Scarborough and Richmondshire areas do not currently have a CIL Charging Schedule in operation and therefore only use S106 commuted sums to contribute to the financial provision of infrastructure.

4.5 Harrogate (CIL)

4.6 CIL was adopted by the former Harrogate Borough Council and came into effect on 1 October 2020. The Levy rates are published in the charging schedule:
