

Improving Mental Health and Reducing Suicide and Self-Harm Guidance for Applicants

BACKGROUND

In April 2018 Durham, Darlington, Tees, Hambleton, Richmondshire and Whitby STP were invited to submit a proposed plan to NHS England for use of funding allocation from April 2018 for suicide prevention.

Darlington Suicide Prevention Group

In response to the government's 'Preventing suicide in England' a cross-government outcomes strategy to save lives (2012) and the subsequent 'Preventing suicide in England: three year on annual report (2017)' a Darlington Suicide Prevention Group (DSP) has been established to oversee the implementation and development of the Darlington Suicide Prevention Plan 2017-2022.

The Suicide Prevention Strategic Group vision...

...is to work together to reduce the numbers of people lost to suicide whilst providing support to those affected suicide in Darlington.

The Darlington picture

Between 2014 and 2016 78% of deaths by suicide were male and 22% were female.

Between 2012 and 2015 in Darlington the highest number of suicides are among men aged 50-59 and this reflects the national picture. 52% of all cases of suicide during this time period were men under the age of 50 years old.

Our aim...

...is to provide funding across the Darlington STP area to support an overall national 10% reduction in suicide rate by 2020/21. This should enhance existing work underway in the locality Suicide Action Plans to improve access and quality of mental health services and to prevent suicides more broadly in line with Public Health England Guidance.

The Prevention Concordat for better mental health PHE 2017 and the Suicide prevention guidance PHE 2016 provide a clear evidence base for working with communities to build emotional resilience, promote better mental health, and prevent mental health deterioration and suicidal behaviours.

Communities play a crucial role in the prevention of poor mental health and the promotion of good mental health and wellbeing and community engagement and development are therefore part of the core deliverables of what "good" looks like in the Prevention Concordat for Better mental Health PHE 2017

Our outcomes...

...will focus on the development of a range of targeted interventions in order to strengthen and build resilience and are making a positive contribution to one, or more, of the following:

- Reducing stigma and discrimination
- Developing mentally healthy communities and workplaces
- Reducing loneliness and social and emotional isolation
- Reducing suicides

The Five Ways to Well-being

Connect	<p>With the people around you. With family, friends, colleagues and neighbours. At home, work, school or in your local community. Think of these as the cornerstones of your life and invest time in developing them. Building these connections will support and enrich you every day.</p>
Be active	<p>Go for a walk or run. Step outside. Cycle. Play a game. Garden. Dance. Exercising makes you feel good. Most importantly, discover a physical activity you enjoy and that suits your level of mobility and fitness.</p>
Take notice	<p>Be curious. Catch sight of the beautiful. Remark on the unusual. Notice the changing seasons. Savour the moment, whether you are walking to work, eating lunch or talking to friends. Be aware of the world around you and what you are feeling. Reflecting on your experiences will help you appreciate what matters to you.</p>
Keep learning	<p>Try something new. Rediscover an old interest. Sign up for that course. Take on a different responsibility at work. Fix a bike. Learn to play an instrument or how to cook your favourite food. Set a challenge you enjoy achieving. Learning new things will make you more confident as well as being fun.</p>
Give	<p>Do something nice for a friend, or a stranger. Thank someone. Smile. Volunteer your time. Join a community group. Look out, as well as in. Seeing yourself, and your happiness, as linked to the wider community can be incredibly rewarding and creates connections with the people around you.</p>
