County Council Webinars

The first COVID-19 webinar is going ahead on Thursday 19th March 2020 at 15:00. We will have presentations from the Council's Public Health Team, Resilience & Emergency Team and Deprivation of Liberty Safeguards Team.

We will then have an allotted time for questions. The webinar is going to be recorded and made available through social media. Any relevant links will be made available to **all** Providers who may not be able to log on live.

We will also review how often we may arrange future webinars, depending on uptake and how quickly the situation may develop and what guidance is available.

To access the Webinar Providers need to register in advance using the following links:

Finally:

Remember - prevention is always better than cure. As with the flu virus, the most effective way to protect yourself from COVID-19, Coronavirus is to adopt good respiratory and hand hygiene to prevent the risk of infection and a 'catch it, bin it, kill it' approach to coughs and sneezes.

The best way to protect yourself and others is:

- wash your hands with soap and water, or use a sanitiser gel, regularly throughout the day;
- catch your cough or sneeze in a tissue, throw away the used tissue, bin it, and wash your hands;
- if you don't have a tissue, use your sleeve;
- avoid touching your eyes, nose and mouth with unwashed hands; and
- avoid close contact with people who are unwell.
