

North Yorkshire COVID-19 Outbreak Control Plan

Easy read version

Updated June 2020

This leaflet is from North Yorkshire County Council.

It tells you about our plan to try and stop and control outbreaks of Covid-19. The plan is to help us have less people with Covid-19 in North Yorkshire.

COVID-19
Coronavirus

Covid-19 is the same as Coronavirus which is a virus that can make people poorly. Sometimes people can die from Coronavirus.

Outbreak means where 2 or more people have got the virus.

We will be telling people about the NHS Test and Trace service and how to contact them if they have Coronavirus symptoms.

Symptoms of Coronavirus are a cough that doesn't go away, not being able to taste or smell or having a high temperature.

We will be telling people about how important it is to wash your hands and stay safe.

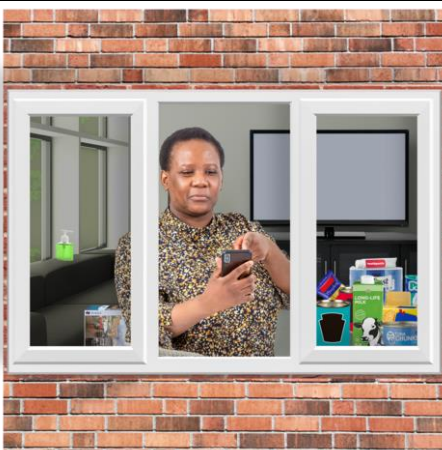

We will be helping to organise testing. This can include testing where people work, test sites in local areas or a test being sent to somebody's home.

We will plan what to do if there is an outbreak in a care home, workplace or school.

We will look at where there are local outbreaks and we will try and stop more happening in that area.

We will help people who need to self-isolate because they have symptoms of Coronavirus.

Self-isolate means not leaving your home for 14 days.

We will work with our partners in your community to help spread the message.

We think that trying to stop the spread of Coronavirus is very important and we need to all work together to do this.
