

# Earthquakes around the British Isles in the last 100 days

Last updated: Wed, 09 Jan 2019 11:40:00 (UTC)

This list is linked to a database that contains information about all the seismic events that we detect and locate. Locations and magnitudes may change as events are re-analysed and revised.

Depths are rounded to the nearest km and all events shallower than 1 km are listed as 1 km. Magnitudes are local magnitude (ML) and are calculated to one decimal place, as is standard practice in earthquake seismology.

Date	Time (UTC)	Lat	Lon	Depth (km)	Mag	Int	Region	Comment
