 - Mixed use
- Flood Zones**
 - 1 in 100 year flood event
 - 1 in 100 year flood event with Climate Change

The 1 in 100 year climate change outlines presented on the map are taken from existing hydraulic models where available. Where climate change outlines do not exist, Flood Zone 2 (see PPS25 Flood Zone maps) should be used as a proxy for how the climate change outlines may look and therefore how a 1 in 100 year flood extent may appear in the future.
