EMBSAY

Date: 8/1/13

## 1 Housing: Which Sites?

Hundreds of sites have been suggested to us for inclusion in the local plan as housing development sites and our Strategic Housing Land Availability Assessment (SHLAA) looks into the pros and cons of each one. Only some of the sites will actually be needed to meet our housing requirements and we therefore need to choose the best ones from those available. Our SHLAA contains a lot of useful information, but we also need to know if people have any preferences for particular sites, and why.

Q Bearing in mind the number of new homes we might need to plan for in this location, which site or sites look preferable to you, and why?

Discussion Table

The photograph shows a wooden table with several papers and sticky notes. The papers include a 'Paving the Way' worksheet with a diagram of a house, a 'Paving the Way' worksheet with a diagram of a house, and a 'Paving the Way' worksheet with a diagram of a house. The sticky notes are yellow and blue.
